Mikołów, Silesia, Poland · B2B, hybrid or remote

Profile

I design and build the backend of large e-commerce platforms. I start from the business process and choose the architecture and integrations so that the system solves the company's real problems, not just runs.

I studied computer science and econometrics, so for me the business process is the starting point, not an obstacle. Before I write a module, I want to know what really happens between an order and an invoice.

Experience

- 2017 – today **Independent PHP developer**
B2B cooperation with merce.com · Mikołów, Poland · hybrid
- Development and optimisation of online stores
 - Integrations with external systems
 - Modules tailored to the project
